

AMAN ULLAH KAZI

Full-Stack Developer · React / Next.js · TypeScript · Node.js · PostgreSQL

Karachi, Pakistan | +92 336-235-4307 | amanullahkazi8@gmail.com | [linkedin.com/in/aman-ullah-kazi](https://www.linkedin.com/in/aman-ullah-kazi) | github.com/amanullah888

PROFILE

BS Artificial Intelligence graduate (FAST-NUCES) and full-stack developer who builds production applications end to end — role-based systems, admin/back-office tooling, consumer-facing web apps and REST APIs. Founder of MatchIT, a mobile-first sports platform built solo across frontend, backend, database and deployment, including a role-differentiated moderator system for dispute resolution. Comfortable owning a feature from schema design to production deploy and working directly alongside a backend/product counterpart. Available immediately, Karachi onsite.

WORK EXPERIENCE

Founder & Full-Stack Developer | MatchIT

- Designed and built a role-based platform end to end — players, referees and moderators each with distinct permissions and views — covering match creation, court booking, tournaments with prizes, and an escrow-style wallet.
- Built an internal moderator queue for dispute resolution — mutual result confirmation, evidence upload, escrow-based stake holding and a trust/reputation scoring system — the closest analogue to an admin/back-office panel in the app.
- Developed REST APIs (Python/FastAPI) covering users, venues, matches, tournaments, teams, chat, notifications and wallet, paired with a Next.js/React/TypeScript frontend and a consistent Tailwind CSS design system.
- Owned OTP authentication with device restrictions, relational schema design and migrations, and containerised Docker/Render deploys — handling environment config and production issues myself as sole developer.

AI Automation Engineer (Contract) | Burky Flows

- Designed enterprise API integrations connecting LLMs to CRMs, messaging platforms and internal tools, scoping requirements directly with the founder against client deadlines.
- Built a RAG-powered WhatsApp AI assistant with document retrieval and conversation memory, from ingestion pipeline through to deployed endpoint.

Freelance Frontend Developer | US-based client — Apartment Showcase Website

- Scoped, built and delivered a responsive React + Tailwind CSS marketing site directly for a paying overseas client, delivered to spec across desktop and mobile.

IT Intern | Global e-Comm Services (Pvt) Ltd — subsidiary of TSL

- Supported web development and deployment work (WordPress, system configuration) alongside cross-functional technical operations in an enterprise environment.

PROJECTS

AgentOps Studio — Next.js 15, TypeScript, FastAPI, PostgreSQL, LangGraph, Docker, AWS, MCP

- Full-stack SaaS with a React Flow canvas front end for building and observing multi-agent workflows; PostgreSQL-backed run history, agent replay and an evaluation dashboard (success rate, latency, token cost).

GridPulse — Python, DuckDB, dbt, FastAPI, Next.js, Tailwind CSS, Recharts

- Weather-to-electricity-demand batch pipeline with a Next.js/Tailwind dashboard serving four interactive data views over a FastAPI backend; deployed as a static Vercel app from batch snapshots.

Retail Sales Intelligence Dashboard — Python, Pandas, SQLite, Plotly, Streamlit, Scikit-learn

- End-to-end analytics platform with an ETL pipeline, automated cleaning, RFM customer segmentation into five tiers, 10+ chart types and a live SQL query console with CSV/DB export.

Neuro-Atlas — Next.js 15, TypeScript, Tailwind CSS, shadcn/ui

- Web app for neuroscience data visualisation with a custom component library, strict-mode TypeScript and optimised font loading.

TECHNICAL SKILLS

Full-Stack: React, Next.js 15, TypeScript, JavaScript (ES6+), Node.js, Tailwind CSS, HTML/CSS, Zustand, shadcn/ui

Backend & APIs: FastAPI, Python, REST API design, SQLAlchemy, authentication & authorisation, role-based access patterns

Databases: PostgreSQL, MySQL, SQLite — schema design, migrations, query optimisation

DevOps & Tools: Git, GitHub, Docker, Docker Compose, CI/CD, Render, AWS App Runner, Linux, Cursor, Claude Code

EDUCATION

BS Artificial Intelligence | FAST-NUCES, Karachi

A Levels — Engineering (incl. Computer Science) | Beaconhouse College Campus PECHS

ADDITIONAL

- Best Speaker Award (APSACS) · Virtual Debate Champion (Beaconhouse BCCP) · House Captain — strong English communicator, comfortable working directly with clients and small teams.
- O/A Level Computer Science & Mathematics tutor (self-employed, 2022 – Present) — practised at explaining technical work clearly.
