

Aman Ullah Kazi

Full Stack Developer

Karachi, Pakistan amanullahkazi8@gmail.com +92 336 2354307 github.com/amanullah888 linkedin.com/in/aman-ullah-kazi

SUMMARY

Full Stack Developer who turns messy ideas into clean, working products — shipping end-to-end across frontend, backend and the AI/automation glue between. I like building things people actually use and making them fast, scalable and delightful: break the problem down, ship the smallest working thing, then make it great.

SKILLS

Frontend & UI

React Next.js TypeScript JavaScript Tailwind CSS

Backend & Systems

Python FastAPI Node.js PostgreSQL SQL

AI, Data & Cloud

LangGraph RAG PyTorch pandas Docker AWS n8n Git & GitHub

EXPERIENCE & MILESTONES

Founder & Sole Developer — MatchIT

2025

Shipped a full sports-community platform solo, from database schema to production deploy: player discovery, match creation, court booking, tournament brackets, teams, chat and an escrow-style wallet for entry fees.

AI Automation & RAG — Burky Flows

2024

Built end-to-end Python + n8n automation pipelines and a RAG-powered WhatsApp assistant with document retrieval and conversation memory.

Software Engineering Intern

2023

Collaborated with a team and shipped real features to real users in a production codebase.

BS Computer Science — FAST (NUCES)

2022 – present

Computer Science studies; foundations in data structures, algorithms and systems. Now also teaching what I have learned, turning hard-won lessons into other people's head starts.

SELECTED PROJECTS

AgentOps Studio

Next.js 15 · FastAPI · PostgreSQL · LangGraph · AWS

Compose & observe multi-agent workflows on a React Flow canvas with a run-logging API and an eval dashboard (success rate, latency, token cost).

Retail Sales Intelligence

Python · pandas · SQLite · Plotly · Streamlit · scikit-learn

ETL + analytics dashboard: cleans and aggregates transactions, RFM segmentation into five tiers, 10+ chart types and a live SQL console.

LCR GPT (contributor)

Python · FastAPI · LangChain · ChromaDB · Docker · AWS

Production RAG assistant for PRA Liquidity Coverage Ratio reporting; parses PDF/XLSX sources, embeds into ChromaDB, serves retrieval-backed answers.

AI-Assisted Radiology (FYP)

Python · PyTorch · TensorFlow · CNNs · OpenCV · DICOM

Deep-learning anomaly-detection pipeline on clinical radiology images; DICOM cleaning/normalization/augmentation and fine-tuned CNNs.
